

PF SOF Kit List (Public)

V 1.3 Public - July, 2026

Abstract:

The purpose of this document is to provide an overview of what kit is needed for PF SOF. These items are not required to attend events, however due to the popularity of groups like Roberts Ragnars, DevTeam Six, etc. having a more cohesive unit look would be a great addition when attending local events. The current kit list does not impersonate any real-life unit, if there is a desire for specific unit looks, that can be discussed at a later point in time. Alternatively, the current list is a Direct-Action kit, field kits for events such as MSW at Centerville where chest rigs can be preferable compared to plate carriers can be discussed later.

Note:

PF Patched Members will be provided with a more detailed list with approved modifications. All items are Multicam unless otherwise stated
